1. Applicant's election of Group I in the reply filed on May 4, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

In view of the search results, the election of species requirement is hereby withdrawn.

2. It is noted that applicants have not separately claimed the compounds of claim 1 while they have claimed the compounds of claim 2. Consequently, it is unclear whether applicants have knowledge of the compounds of claim 1 as known compounds. Until this point is clarified in the record, for purposes of this initial examination, it will be assumed that the compounds of claim 1 are known per se as light stabilizing compounds. Applicants may overcome the rejection set forth below by stating that to the best of their knowledge, these compounds were not previously known.

3. MacLeay et al. (5,338,853) is cited as disclosing light stabilizing compounds of chemical structure similar to that instantly claimed (see formula I). However, the reference does not teach or suggest a compound with a divalent linking group as recited by claim 1.

4. Claims 1 and 4-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wickramanayake et al. (US2003/017451). The reference discloses a porous coating composition for forming an ink jet recording medium. The composition includes polyvinyl alcohol binder and silica (see example 1 [0037]). The reference also discloses treating the silica with a compound that may be a pyridyl compound and has light

stabilizing properties [0018, 0019, 0021]. Based upon this disclosure, it would have been obvious to include a known pyridyl light stabilizing compound and to coat the composition on a support to form an ink jet recording medium.

5. Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Pamela Schwartz whose telephone number is (571) 272-1528.
